## [ Woolfson Eye Institute ]

Woolfson Eye Institute, the gold standard in vision care, has long been the recognized leader in laser vision correction, ophthalmology, and oculoplastic surgery, along with non-surgical rejuvenation procedures. To date, Woolfson has expertly corrected the vision of more than 500,000 patients, ranging from professional athletes (Woolfson is the official LASIK provider of the Atlanta Hawks and Atlanta Falcons) to the most discerning of LASIK patients, including eye doctors themselves.

Further demonstrating its leadership and commitment to eye care, Woolfson founder and medical director, Jonathan Woolfson, MD and R. Doyle Stulting, MD, PhD recently co-founded the Stulting Research Center at Woolfson Eye Institute, an independent research organization that conducts clinical trials and studies on advanced treatment and prevention of eye diseases.

In addition to advanced custom and bladeless LASIK, Woolfson also specializes in treating cataracts,

corneal disease, retinal disorders, glaucoma, and other eye diseases along with non-surgical rejuvenation procedures to keep you looking and feeling your best.

A thorough medical evaluation, personalized treatment and a lifetime assurance plan are hallmarks of the Woolfson experience. In fact, Woolfson has consistently ranked number one in safety and satisfaction in blind customer surveys, making it the Southeast's quantitative leader in LASIK and ophthalmology treatment.
